

DESIGNER

Darcy

Darcy is a fantastic designer who is able to express complex data tables and help people visualize complex ideas very easily. They are a terrific story teller and are able to do so with a combination of images, text, and even videos.

They feel that they can do their best work outside in the sun. They do all they can to shade their screen, but often there just isn't enough contrast. Darcy needs the ability to shift to high contrast or dark mode to be able to see better in different conditions.
